

Polis

(a live mix with soundscapes **monitored**, **connected** and **confined**)

Sound Installation by Christian Galarreta

This audio and video streaming is the proof that Internet and the media of communications allow us to cross the borders and create collaborations between communities and persons (Ukraine / Peru / France). But it is also the proof that the contradiction is growing between the opening carried out by the media and the closing of borders carried out by security policies. When will we pass from the screen to the streets?

From Maisons-Alfort/France

Live transmission of a soundscape

From Enakievo/Ukraine

Live video transmission from a security camera located in the center of the city

+

From Lima/Peru

a loop of pre-recorded and processed sound environments

=

Everything is mixed and emitted here in Lviv / Ukraine right now.
